

Our speaker this month was Megan Clark Young and her talk was titled "He Wasn't a Captain! Strategies to Correct Myths and Mistakes Using Modern Methods". She showed how to identify incorrect information and give some creative ideas to correct information that may be out there.

Megan gave an interesting talk with lots of good examples about common errors that occur in genealogies, how you can determine that reported facts are in error, and ways how to remedy those errors. For those who could not attend, she had a handout that she agreed to share with our entire group.
